

**Awalix, LLC (AWX) | Construction Division** is a full-service in-water construction, stream and habit restoration, facility maintenance and integrated power and heavy civil construction service provider. We are a 100% owned subsidiary of the Aleut Community of Saint Paul Island (ACSPI), Tribal Government from the Pribilof Islands of the Bering Sea, with corporate office in Anchorage, Alaska. ASCPI and Awalix have been a trusted government contracting partner for over 50 years. With our deep industry knowledge and expertise, we provide customized services that meet the specific needs of clients that require excellence in service and assurance that goals and objectives will be met.

There are few business opportunities on our small island, so our people travel far from home to operate successful businesses that serve Federal Agencies in the Pacific NW, and Alaska's remote operations. We guide our subsidiary businesses, **like AWX** with a focus on providing exceptional service to our customers and we require all our employees to conduct themselves with the **Aleut people's ancient values** in mind. These values include **honesty, humility, respect, trust, sharing and hard work**.
